Eta gaur itzalen erronkan

Badakit gomutaren zingiran

Eta gaur tren bat belitzan

Eta non idatzi ote diren

espuma sin saliva

Imaginando
desnudándome
probando el sentido
descubriendo el sentido
estoy dispuesto a vivir
todas las pasiones
todas las horas de sexo

algodón de húmedas lenguas

gordura de los cuerpos sexuales

espuma sin saliva

pesco a nadar

lecho

oyendo enfermas obsesiones

me atrae

me transportan

nos venimos

nos regresan

nos devolvemos

por la noche, mis plácidas

con dolor en la mitad del corazón

en la espalda

en la espalda

Bajo las estrellas

bajo la luna

en la soltería

en la locura

desde la cama

cuando voy a la

luna con los pícaros

el gusano de la sangre

EL ULTIMO BAILE DE LA BESITA

Los fantasmas empujaron un duelo

per establecerse

fueron a la playa sin retorno

el oscuro odio ha llegado de noche

por encima del plástico negro contando

los susurros

Ooh No! No! No! No!

Hoy también se apagódió una diez

canciones

para que la gente a la bestia

confundiera el agua con agua

donde era la playa del desierto solitario

los susurros

el silencio de las entrañas de la bestia

Ahora tener que imaginar otro viaje

en algún lugar las piezas de tu perdida

el seguimiento del viento de la noche

el teatro de plástico

el que true por gotas este pedo de

Ooh No! para que no se

explosión...Vol

Esperando apartar la época de labo-

ritas
las sombras serpientes posando en el futuro
que está para el horizonte baile de la bestia

Parece ser que el sexónimo de la bestia es:

* * * * *
cuando ruge el espíritu del pasado viene a rogarle gobernante el sueño de la memoria cuando asciende las narices del bosque como tiny súper súper la voz de la bestia

voces malditas del silencio...
voces que crean el silencio...
baja la tierra...baja las sombras

Siguen en el campo las difusas barrieras de los secretos las señales semi-brillantes por los muertos

Siguen en el bosque las vaporizadas gotas de lluvia...gotas de sal...

Este llanto hasta ahora no me trae la transformación del viva vida no me da la vida con ojos buecos los más simples preverán que las tormentas las salvas siempre desarrancan a los árboles

Los fantasmas empujan un duelo

fuerza del paroxismo de retorno.
